Dedicated and forward-thinking computer science professional, specializing in software engineering and possessing a solid foundation in computer science principles. Eager to leverage technological innovation to address complex challenges and drive solutions. With a focus on software development, algorithm design, and data structures, I bring a results-oriented mindset and strong problem-solving skills to dynamic, crossfunctional teams.

My passion extends to exploring the intersection of computer science and physics, with a goal of applying scientific principles to advance technology. A commitment to continuous learning and adaptability allows me to thrive in rapidly evolving tech environments. Beyond my technical pursuits, I am an avid sketch artist, using creativity to explore diverse perspectives.

I am actively seeking opportunities to contribute my expertise to impactful projects and make a meaningful difference. If you're interested in collaboration or connecting, please don't hesitate to reach out.
